

Business Intelligence & Performance Analysis Report: BECO

Executive Summary

This report analyzes sales performance, channel effectiveness, customer segmentation, and supply chain operations for **BECO** across a 6-month period (January–June). With total gross revenue reaching **₹3.53M** (Net Revenue: **₹3.00M**) across **12K orders**, BECO exhibits strong profit margins (**45.3%**, generating **₹1.60M** in profit). However, opportunities exist to optimize revenue dip cycles, improve direct-to-consumer (D2C) margins, and streamline supplier distribution.

Key Performance Indicators (KPIs)

Metric	Value	Insights / Context
Gross Revenue	₹3.53M	Total sales before cancellations/returns
Total Revenue	₹3M	Net realized revenue
Total Profits	₹1.60M	High profitability margin (~53.3% of Net Revenue)
Total Orders	12K	Total fulfilled and attempted orders
Total Customers	2,480	High repeat/volume engagement per customer
Total Quantity Sold	21K Units	Average ~1.75 units per order

Avg. Selling Price	₹294.15	Unit selling price baseline
Order Fulfillment	92.29% Delivered	5.09% Cancelled / 2.8% Returned
On-Time Delivery	92.84%	Lead Time Avg: 6.0 Days

Major Findings & Insights

1. Sales Trends & Seasonality

- **Revenue Fluctuation:** Sales experience sharp cyclical peaks and troughs. Peak months occur in **January, March, and May** (~₹500K/month), followed by notable pullbacks in **February and June** (~₹420K–₹430K).
- **Delivery Efficiency:** Average delivery time across major tier-1 and tier-2 cities is exceptionally low at **1.29 to 1.41 days** (Max delivery cap: 4 days).

2. Channel Performance & Strategy

- **E-Commerce & Quick-Commerce Dominance:**
 - **Amazon** leads overall channel revenue at **25.32%**, closely followed by **Blinkit (20.16%)**, **Flipkart (19.42%)**, and **Zepto (15.28%)**.
 - Quick-Commerce (Blinkit, Zepto, Swiggy Instamart) collectively commands over **47%** of total order volume.
- **Underperforming D2C Channel:** The owned **Beco D2C Website** accounts for only **8.07% of total sales** (0.19% volume share), highlighting significant reliance on third-party marketplaces.

3. Regional & Customer Distribution

- **Top Geographic Hubs:** **Maharashtra** leads state-level order volume by a substantial margin, driven primarily by **Mumbai, Pune, and Thane**. **Tamil Nadu (Chennai)** and **West Bengal (Kolkata)** rank as the next top-performing regions.
- **Customer Segments:** The top customer tier represents **60.52%** of the customer base (1.51K customers), ensuring a stable volume baseline across major urban hubs.

4. Operations & Supply Chain

- **Supplier Reliance:** **GreenBio Surfactants** is the dominant supplier, handling **33.63% (4.04K) of orders**. Other suppliers (Vanguard Eco, PureHerb, EcoPulp, CornPlast) share the remaining ~66% equally (~16–17% each).
- **Defect & Delay Metrics:** Overall supplier defect rate sits at **1.72%**, while average lead time is **6 days** with an **On-Time Delivery rate of 92.84%**.

Strategic Recommendations

1. Smooth Out Bi-Monthly Revenue Dips

- **Tactics:** Run bi-monthly promotional events or subscription renewals during mid-quarter slump months (**February, April, June**).
- **Action:** Introduce replenishment reminders for high-turnover FMCG items like *Dishwash Liquid* and *Garbage Bags*.

2. Scale D2C Channel & Direct Margins

- **Tactics:** Shift focus toward expanding the **Beco D2C Website** (currently only 8.07% of sales) to capture higher direct margins and retain customer data.
- **Action:** Implement exclusive D2C bundle packs, loyalty reward points, and first-time purchaser discounts.

3. Mitigate Delivery Cancellations & Returns (~7.89%)

- **Tactics:** Combined cancellations (5.09%) and returns (2.8%) account for nearly **1K lost orders**.
- **Action:** Audit address validation pipelines on quick-commerce/e-commerce checkouts and set automated SMS/WhatsApp delivery confirmations.

4. Diversify Supplier Dependence

- **Tactics:** Over 33% of order volume relies on a single supplier (**GreenBio Surfactants**).
- **Action:** Rebalance order allocation toward secondary suppliers (*Vanguard Eco* and *PureHerb*) to guard against supply chain single-point failures and reduce the 1.72% defect rate.
